

Lego masters: Category winners of a Cotswold School Lego competition, at front from left, Zac Auckram and Tyler Shaw. Back row from left, Jack Hardy, Nicole Chappell, Kyle Andrews and Luke Henley.

Student creates contest

A year 6 student at Cotswold School, Bishopdale was so passionate about Lego he created an in-school competition to challenge school mates to design and build the ultimate Lego creation.

Tyler Shaw, 11, with the help of teacher aid Leanne Baker organised the Lego competition and prizes for six different categories of the Lego build.

These included simply small, homes, moving machines and design-by-me categories.

Almost 200 entries were received, demonstrating vast creativity from the young minds. Entries were displayed and all 21 classes at the school voted for their favourites.

Winners were: Kyle Andrews, 8, for his Lego brainstorm in the design by me category, Luke

Henley, 9, for his tiny boats and cars in the simply small category, Jack Hardy, 9 for his moving car in the moving machines category, Nicole Chappell, 6, for her colourful family cafe and Dublin Boon, 5, for his cruise ship in the vehicles category.

Overall supreme winner was Zac Auckram, 11 who built a stadium.
